

DAMAGE OCCURRED TO THE INSURED ELECTRONIC EQUIPMENT AS A CONSEQUENCE OF PHYSICAL DAMAGE TO THE AIR CONDITIONING EQUIPMENT

CLAUSE 1. RISKS COVERED

Subject to the previous payment of an extra premium on behalf of the Insured, and in addition to the terms, exclusions, clauses, and conditions contained in the Policy or endorsements thereon, the Company shall indemnify the Insured against eventual damage or loss to the electronic installation due to failure in the air conditioning equipment, provided such is covered against physical damage in a Machinery Breakdown Policy, and has been designed, installed or assembled, in accordance with the electronic installation manufacturer's recommendations.

Such air conditioning equipment must comply with the following requirements:

- 1.1 The alarm and protection devices shall be checked at least every 6 (six) months by qualified personnel, whether by the Insured or supplier.
- 1.2 It shall have independent sensors to monitor the temperature and humidity, detect smoke and provide acoustic and optical alarm.
- 1.3 It shall be in the care of qualified personnel who shall be able to take all necessary steps to prevent the occurrence of any damage in the event of loss.
- 1.4 It shall have automatic disconnecting devices in case of emergency, in accordance with the requirements of the manufacturers of such electronic installation.

In compliance with the above requirements, and if the air conditioning equipment is duly covered under a physical damage Policy, the direct physical damage to the electronic data processing installation is covered as a result of failures in the air conditioning provoking any peril covered in item I of the Particular Conditions of the this section or endorsements attached thereon.
